IDENTIFIERS	*New Jersey High School Proficiency Test

ABSTRACT

Results are presented from the administration of the New Jersey High School Proficiency Test (HSPT) to ninth graders in April 1988. The test was administered to 69,364 students in grade 9 and to over 30,000 students in higher grades who had previously failed one or more parts of the examination. This report includes a series of tables summarizing only the grade 9 results in reading, mathematics, and writing. Comparisons of student performance include: (1) percent passing; (2) mean score; and (3) score distribution categories. Tables also compare student performance by district factor groups, urban district, and regional curriculum service units. Results are compared to student performance in 1987 and the base year for the test considered, whether 1984 or 1985. The reading section of the HSPT was passed by 93.4% of the students, an increase over the 1987 percent passing of 91%. The mathematics test was passed by 81.8%, also an increase over 1987; and 90.7% passed the writing section, a similar increase. In comparison with the base years, the percentages passing all three areas increased. Overall, there was an increase in scores at the higher end of the scale. Forty-nine tables of district and school results present study data. (SLD)

1987-88 High School Proficiency Test Results - Grade 9
Executive Summary

The New Jersey High School Proficiency Test (HSPT) consists of three sections--reading, writing, and mathematics--and must be passed as one of the requirements for a high school diploma. If a student does not pass one or more sections, he or she will receive additional instruction and will be retested on that section or sections. The passing scores for the HSPT are: reading - 75, mathematics - 61, writing - 77.

The HSPT was administered on April 12, 13, and 14, 1988 to *69,364 students in grade nine, *19,839 students in grade ten, and *10,363 students in grade eleven. The population of students in grades ten and eleven who were tested consisted of students who previously did not pass one or more sections of the test and newly-enrolled tenth and eleventh graders who did not attend a New Jersey public school as ninth or tenth graders.

This report includes a series of tables summarizing grade nine test results statewide for reading, mathematics, and writing. (The performance of grades ten and eleven students is presented in separate reports.) Comparisons of student performance include percent passing, mean score, and score distribution categories. Because the passing scores differ for reading, mathematics, and writing, the score distributions described in this report differ accordingly.

In addition, tables are included that compare student performance for the following categories: District Factor Group (DFG), 56 Urban Districts, and Regional Curriculum Services Units (RCSUs). An explanation of District Factor Groups is included at the end of this report. Finally, the report contains district-by-district and school-by-school results grouped by DFG. The HSPT scores in this report exclude special education students, limited English-proficient students, and students whose answer folders were voided.

Results for each subject are compared to student performance in 1987 and to the base year for test administration. For reading and mathematics, the base year is 1984; for writing, it is 1985. The writing results are compared to 1985 instead of 1984, due to a change in the method for scoring the essay portion of the test from the Holistic Method in 1984 to the Registered Holistic Method used in 1985 and subsequent years. It would be inappropriate to compare test results when different methods of scoring essays were used.

Reading

Of the 68,008 students tested, 63,515, or 93.4 percent, passed the reading section of the HSPT. This represents an increase of 2.4 percentage points compared to the 1987 percent passing of 91.0. The mean score for 1988 was

*This figure represents the total number of students to whom at least one section (reading, mathematics, or writing) of the HSPT was administered, excluding those classified as special education or limited English-proficient, or whose answer folders were voided due to a breach of security by a school district.

BEST COPY AVAILABLE

90.6, an increase of 2.3 compared to the 1987 mean of 88.3, and an increase of 13.3 compared to the 1984 mean of 77.3.

On the 1988 reading section, 71.8 percent of the students scored between 89-100, compared to 62.2 percent in 1987, and 32.3 percent in 1984, an increase of 9.6 and 39.5 percentage points, respectively. This increase was combined with a decline in the percent of students scoring 49 or below. In 1984, 7.8 percent of the students scored between 0 and 49; in 1987, that figure dropped to 0.4 percent, and in 1988, to 0.2 percent.

Of the 21,089 students tested in the 56 Urban Districts, 84.4 percent passed the reading section; in 1987 the percent of students who passed was 79.6, a gain of 4.8 percentage points. The percent of students in the 56 Urban Districts who passed the reading section was 13.0 percentage points lower than all other districts and 9.0 percentage points lower than the statewide average. A comparison of mean scores for the 56 Urban Districts indicates an increase of 2.5 from 1987 to 1988 and an increase from the 1984 base year to 1988 of 17.4.

The score distributions show that in the 56 Urban Districts 50.9 percent of the students scored 89 or above in 1988 compared to 40.7 in 1987, an increase of 10.2 percentage points. In 1984, 12.4 percent of the students scored 89 or above; this represents an increase of 38.5 percentage points compared to this year. At the lower end of the scale, 0.6 percent of the students scored 49 or below in 1988, compared to 1.0 in 1987 and to 22.0 in 1984. Compared to 1988, this represents decreases of 0.4 and 21.4 percentage points, respectively.

In all other districts, 81.2 percent scored 89 or above in 1988, compared to 72.1 in 1987 and to 37.7 in 1984. Compared to 1988, this represents increases of 9.1 and 43.5 percentage points, respectively. Between 1984-88, the percent of students who scored 49 or below declined. In 1988, it was less than 0.1 percent; in 1987 it was 0.1, and in 1984, 4.0.

Mathematics

The mathematics section of the HSPT was administered to 68,738 students. Of this total, 56,260 or 81.8 percent passed, an increase of 4.8 percentage points compared to the 1987 percent passing of 77.0. The mean score in 1988 was 77.0, an increase of 2.7 compared to the 1987 mean of 74.3, and an increase of 14.4 compared to the 1984 mean of 62.6.

The score distributions show that 50.9 percent of the students tested scored 81 or above, compared to 43.5 in 1987 and 22.5 in 1984, an increase of 7.4 and 28.4 percentage points, respectively. This increase was accompanied by a decline in the percent of students scoring 40 or below. In 1984, 15.0 percent scored between 0 and 40; in 1987 that figure had declined to 4.4; in 1988, it was 3.0, a decrease since 1984 of 12.0 percentage points.

A total of 21,559 students in the 56 Urban Districts were tested in mathematics. The passing rate was 66.0 percent compared to a passing rate in 1987 of 59.0, for an increase of 7.0 percentage points. While this increase was higher than the 3.8 percentage point increase shown by all other districts between 1987 and 1988, the percent of students in the 56 Urban Districts who passed the mathematics section is 23.1 percentage points lower than all other districts and 15.8 percentage points lower than the statewide average. A

comparison of mean scores for the 56 Urban Districts indicates an increase of 3.3 from 1987 to 1988 and an increase from the 1984 base year to 1988 of 16.6.

The score distributions show that for the 56 Urban Districts, 31.1 percent of the students scored 81 or above in 1988, compared to 24.4 in 1987, an increase of 6.7 percentage points. In 1984, 9.4 percent of students in the 56 Urban Districts scored 81 or above; the 1988 figure of 31.1 percent represents an increase of 21.7 percentage points. The percent of students in the 56 Urban Districts who scored 40 or below was 6.9 in 1988, 10.5 in 1987, and 30.3 in 1984, for a decrease between 1984-88 of 23.4 percentage points.

In all other districts 60.0 percent of the students scored 81 or above in 1988 compared to 52.3 percent in 1987 and 28.3 percent in 1984, an increase of 7.7 and 31.7 percentage points, respectively. At the lower end of the scale, in 1988, 1.2 percent of the students scored 40 or below. In 1987, the percentage was 1.7, and in 1984, 8.2, for a decrease between 1984-88 of 7.0 percentage points.

Writing

Statewide, 68,020 students were tested on the writing section of the HSPT. Of this total 61,704, or 90.7 percent, passed the writing section, an increase of 4.8 percentage points compared to 1987. The mean score in 1988 was 85.9, an increase of 1.2 compared to the 1987 mean of 84.7, and an increase of 5.9 compared to the 1985 mean of 80.0.

The score distributions show that since 1985 there was a continued shift in the test scores toward the upper end of the distribution scale. In 1985, 17.4 percent of the students scored between 89-100; in 1987, the percent was 30.8; and this year it was 33.9, an increase of 16.5 and 3.1 percentage points, respectively. A similar shift was seen also at the lower end of the scale. In 1988, 1.1 percent of the students scored 64 or below. In 1987, the percent was 1.5 and in 1985, 6.1, for a decrease of 0.4 percentage point between 1987-88 and a decrease of 5.0 percentage points between 1985-88.

In the 56 Urban Districts, 81.1 percent of the 21,049 students tested passed the writing section of the HSPT. This represents an increase of 9.2 percentage points compared to the 71.9 percent who passed in 1987. In all other districts, 95.0 percent of the students passed the writing section in 1988. This figure is 13.9 percentage points higher than the passing rate for students in the 56 Urban Districts. The percent of students in the 56 Urban Districts who passed the writing section is 9.6 percentage points lower than the state average. A comparison of mean scores for the 56 Urban Districts indicates an increase of 2.0 from 1987 to 1988 and an increase from the 1985 base year to 1988 of 7.5.

The score distributions show that in the 56 Urban Districts, 20.6 percent of the students scored 89 or above in 1988, compared to 16.1 in 1987, and 7.8 in 1985, an increase of 4.5 and 12.8 percentage points, respectively. The percent of students who scored 64 or below was 2.7 in 1988, 3.8 in 1987, and 14.0 in 1985, representing a decline since 1985 of 11.3 percentage points.

In all other districts, the percent of students who scored 89 or above in 1988 was 39.9; in 1987, it was 37.5; and in 1985, 21.7. In 1988, this represented an increase of 2.4 percentage points compared to 1987, and an increase of 18.2

percentage points compared to 1985. The percent of students who scored 64 or below in 1988 was 0.4; in 1987, it was 0.5; and in 1985, it was 2.6, for a decrease between 1987-88 of 0.1 percentage point, and a decrease between 1985-88 of 2.2 percentage points.

On the essay portion of the writing section, the statewide mean score for 1988 was 8.4, compared to a mean score in 1987 of 8.4 and a mean in 1985 of 7.6, representing an increase from 1985-88 of 0.8.

The score distributions indicate that in 1988, 82.4 percent of the students had essay scores between 8 and 12; in 1987, this figure was 79.9 percent, for an increase of 2.5 percentage points. In 1985, 58.0 percent of the students had scores between 8 and 12; compared to 1988, this represents an increase of 24.4 percentage points.

In the 56 Urban Districts, the mean essay score went from 6.8 in 1985 to 7.7 in 1987, and to 7.8 in 1988. This represents an increase of 1.0 during the period 1985-88. The score distributions indicate that in 1988, 71.0 percent of the students had essay scores between 8 and 12; in 1987, the percent was 66.5; and in 1985, it was 39.9. This represents an increase of 4.5 percentage points compared to 1987 and an increase of 31.1 percentage points compared to the 1985 base year.

In all other districts, the 1988 essay mean was 8.6 compared to 8.7 in 1987 and 8.0 in 1985. In 1988, 87.7 percent of the students had essay scores between 8 and 12; in 1987, that figure was 86.1 percent; and in 1985, it was 66.0 percent. This represents an increase between 1987-88 of 1.6 percentage points and an increase between 1985-88 of 21.7 percentage points.

On the multiple-choice portion of the writing section, the mean score this year was 87.7, compared to 84.1 in 1987 and 78.0 in 1985, an increase of 3.6 and 9.7, respectively. The score distributions indicate that in 1988, 80.8 percent of the students scored 81 or above, while in 1987, this figure was 68.7, an increase of 12.1 percentage points. In 1985, 48.0 percent of the students scored 81 or above; compared to 1988, this was an increase of 32.8 percentage points.

In the 56 Urban Districts, the mean score in 1988 was 83.4, compared to 78.6 in 1987 and 71.3 in 1985, an increase of 4.8 and 12.1, respectively. The score distributions show that in 1988, 65.4 percent of the students scored 81 or above; in 1987, it was 49.2 percent; in 1985, 30.0 percent. This represents an increase of 16.2 percentage points between 1987-88 and 35.4 percentage points between 1985-88.

In all other districts, the mean score increased from 80.9 in 1985 to 86.6 in 1987, and to 89.6 in 1988. This represents an increase from 1987-88 of 3.0 and an increase from 1985-88 of 8.7. The percent of students scoring 81 or above was 87.7 percent in 1988, 77.6 percent in 1987, and 56.0 percent in 1985. This represents an increase between 1987-88 of 10.1 percentage points and an increase between 1985-88 of 31.7 percentage points.

Summary

The percent passing for 1988 was 93.4 percent in reading, 81.8 percent in mathematics, and 90.7 percent in writing. The number of students who did not pass each section of the test is 4,493 in reading, 12,478 in mathematics, and

6,316 in writing. Statewide, the number of grade nine students who passed all three sections of the test this year was 53,204 (76.7 percent); in 1987, the number was 52,460 (70.6 percent). Compared to last year, this represents an increase of 6.1 percentage points.

In addition to increases in the percent of students who passed all three sections of the test, this year saw increases in the percent of students who passed each section compared to last year. The greatest increase was in writing and mathematics. Compared to last year, there was an increase of 4.8 percentage points in the percent of students who passed the writing and mathematics sections. The increase in reading was 2.4 percentage points compared to last year. In the 56 Urban Districts, the percent of students who passed each section of the test continued to be lower than all other districts; however, their rate of improvement increased in each of the last two years.

In addition to increases in percent of students who passed each section of the test, there continued to be a shift in distribution of test scores from the lower end to the higher end of the scale. This was indicated for each section of the test in the 56 Urban Districts and for all other districts. Accompanying this increase at the higher end of the scale, was a decline in the percent of students who scored in the lowest categories of distribution and an increase in the percent of non-passing students who scored in the category just below the passing score.

COMMUNITY TYPES AND DISTRICT FACTOR GROUPS

A. Community Types

1 — Urban Center (UC): densely populated with extensive development.
2 — Urban-Suburban (US): near an urban center but not as highly developed, with larger residential areas.
4 — Suburban (S): predominantly single-family residential within a short distance of an urban area.
5 — Suburban-Rural (SR): rapidly developing area, but still large tracts of open land available for development.
6 — Rural (R): scattered small communities and isolated single-family dwellings.
7 — Rural Center (RC): high-density core area with surrounding rural municipalities.
8 — Rural Center Rural (RCR): small developed core area surrounded by rural areas.
9 — Vocational (V): primary emphasis on vocational training under a separate educational jurisdiction.
0 — Regional District (RD): an educational jurisdiction established to service several surrounding communities.

B. District Factor Groups

The District Factor Group (DFG) is an indicator of the socioeconomic status of citizens in each district and has been useful for the comparative reporting of test results from the statewide testing programs. The measure was first developed in 1974 using demographic variables from the 1970 United States Census. Since that time, however, the socioeconomic status of some districts may have changed considerably. Therefore, an updating of the DFG designations was needed.

The DFG's have been updated using seven socioeconomic variables from the 1980 United States Census. These are:

(1) Educational level

1 = elementary (0-8 years) through high school (1-3 years)
2 = high school (4 years)
3 = college (1-3 years)
4 = college (4 years)
5 = college (5+ years)

(2) Occupational status

1 = laborers
2 = service workers (except private and protective)
3 = farm workers

4 = operatives and kindred workers
5 = protective service workers
6 = sales workers
7 = clerical and kindred workers
8 = craftsmen, foremen, and kindred workers
9 = quasi-professionals
10 = managers, officials, and proprietors
11 = old and new professionals

(3) Density

number of persons per household

(4) Urbanization

percent of district considered urban

(5) Income

median family income

(6) Unemployment

percent of those in the work force who received some unemployment compensation in 1979

(7) Poverty

percent of residents below the poverty level in 1979

The variables were combined using a statistical technique called principal component analysis, which resulted in a single measure of socioeconomic status for each district. Districts were then ranked according to their value on this measure and divided into 10 equally-sized groups. Hence, DFGs range from A (lowest socioeconomic districts) to J (highest socioeconomic districts). In addition, special service districts are not included and all vocational districts are designated DFG "V".
